

Editing content

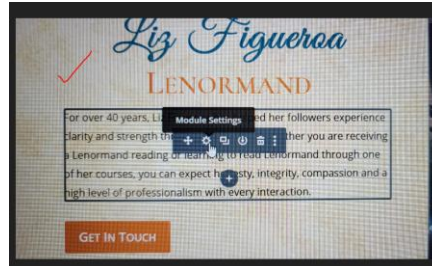

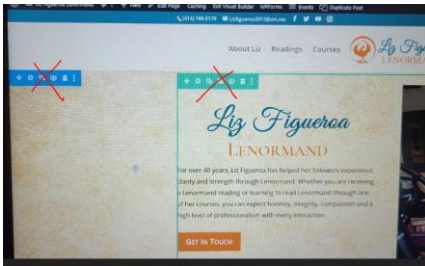

1. Select the page you would like to edit.
2. When it opens click the purple “Edit with the Divi Builder” button.

This Layout Is Built With Divi

Edit With The Divi Builder

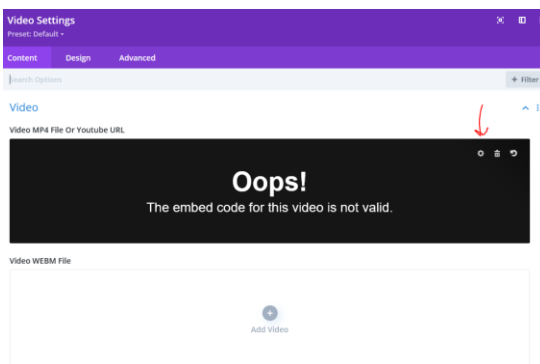

3. This will open the live editing view of that page.
4. Hover over the section you would like to edit. The copy, images and links are inside the gray boxes. When you hover over the different areas they will display a different color around them. You will not need to do anything to the blue and green areas, these are just setting up the look of the row.

5. Once the gray box shows (if you move away from the content it will go away, just hover over it again and it will appear), put your cursor where you want the changes and make them!
6. When you've completed your changes click the purple dot on the bottom center of the page and then to the right on the bottom will be a green button that says “Save” on it.
7. You are now live.

Updating the Video Link on Homepage

1. Hover over image and click on the gear icon in the gray box.
2. In the next screen click the gear icon in the video box. Don't worry about the message in this window.

3. After you click that the media window will appear, click the tab that says “Upload Files” after that opens on the left side you will see two choices, select
